

Past Cyber Seniors

Cyber Seniors Program is possible thanks to a grant from the Blandin Foundation, the Willmar Area Community Foundation and a partnership with New London-Spicer High School.

Cyber Seniors Program

Are you a senior that would like some training and education using email, a smart phone or iPad? Maybe you already know the basics and want to expand your tech knowledge?

Cyber Seniors Program partners students from New London-Spicer High School with seniors who want to become more proficient with computer and smart phone technology.

Seniors participate in an eight week course offered at the Dethlefs Senior Center.

All levels of experience with technology are welcome.

A lot of LEARNING and FUN has taken place since the Cyber Seniors Program started in 2018. Get signed up today!

“Connecting Generations”
